(54) 【発明の名称】 皮膚外用剤

(57) 【要約】

【構成】 下記一般式化1で表されるゲンチシン酸とトラネキサム酸のエステル体およびその塩よりなる群から選ばれる1種または2種以上と、アニオン性界面活性剤の1種または2種以上と、アニオン性界面活性剤以外で分子内に窒素原子を有する界面活性剤の1種または2種以上とを含有する皮膚外用剤。

【化1】

【効果】 ゲンチシン酸とトラネキサム酸のエステル体およびその塩の経皮吸収促進効果に優れ、かつ、安全性、使用感触も良好である。

(54) Title of the Invention: Agent for External Use to Skin

(57) Abstract

CONSTITUTION: It is to provide an agent for external use to the skin containing one or two or more compounds selected from the group consisting of a gentisic acid-

tranexamic acid ester represented by the following general formula (1) and its salt, one or two or more anionic surfactants, and one or two or more of surfactants having an N atom in the molecule except the anionic surfactant.

[Chem. 1]

EFFECT: It is to exhibit an excellent percutaneous absorbefacient promoting effect of a gentisic acid-tranexamic acid ester and its salt, and also exhibit excellent safety and feeling of use.

[0018]

Besides the above-mentioned essential ingredients, the agent for external use to the skin according to the present invention can be compounded with ingredients which are generally compounded in drugs, quasi drugs, cosmetics and the like. Examples of these ingredients include polyhydric alcohol such as glycerin and propylene glycol, oil such as liquid paraffin, squalane, higher fatty acid and higher alcohol, organic acids such as citric acid and lactic acid, alkalis such as sodium hydroxide and triethanolamine, cationic surfactant, amphoteric surfactant, nonionic surfactant, powder, pigment, dye, antiseptic/antifungal agent, antioxidant, ultraviolet absorber, chelating agent, thickener, moisturizer, alcohol, water and perfume.
